

ADJUSTABLE FLATPACK LEAD FORMERS... TWO GREAT CHOICES

The **FP-1MAS-2** is adjustable for component body size, body-to-bend, stand-off height, and footpad. Processing one side of the component at a time, this die cuts and forms flatpacks to a reflow form. This two stage die forms first, then cuts the leads in the second stage.

- A - Adjust for body-to-bend.
- B - Adjust for stand-off height.
- C - Adjust for component body.
- D - Adjust for footpad.
- Radii and lead thicknesses are fixed.
- Optional inserts for lead thickness and radius.

The **FP-2MAS** is adjustable for component body size, body-to-bend, and stand-off height. It minimizes component handling by processing two sides of the component at a time. A digital linear scale makes set-up easy. A precision lead screw adjusts for body size and body-to-bend.

- A - Adjust for stand-off height.
- B - Adjust for component body.
- C - Adjust for body-to-bend.
- D. Component alignment guides.
- Radii and lead thicknesses are fixed.
- Footpad is fixed, please specify.
