

MK Series

PNEUMATIC CUT/LAYOVER, CUT/SWAGE, CUT-ONLY TOOLS

Trigger-Activated Blades Eliminate Post-Solder Trimming
Lightweight, Ergonomic Tools Prevent Operator Fatigue

REDUCE ASSEMBLY COST

- **Eliminate Part Fall-Out**
- **Meets All Mil-Spec Requirements**
- **Ensures Excellent Mechanical Retention**

SPECIFICATIONS

- **Utilities:** 80 psi
- **Weight:** MK-3 8.8 oz.
MK-6 5.3 oz.
- **Components:** 0.015" - 0.035" lead dia.

The Manix **MK Series** pneumatic hand tools cover a number of options: cut and layover, cut and swage, and cut only. All are designed for component assembly prior to soldering. These tools are lightweight and offer ergonomic design, preventing operator fatigue and carpal-tunnel syndrome. All lead waste drops safely to the table or PCB, eliminating flying, dangerous cut-offs and ensuring operator safety.

MK-3 Series Cut and Layover, Cut Only Tools

Exclusive trigger activated, scissor type blades, manufactured of 60C Rockwell hardened tool steel, won't scrape leads or mark circuit boards. Cut and layover or cut only component leads in a single stroke. The tapered head allows access to even the most densely populated underboard areas.

MK-3 Series Cut and Layover Tools

Part#	Cut Lgth.	Lead Dia.	Rep. Blades
MK-1351	0.080"	0.035"	MK-2305
MK-1352	0.060"	0.025"	MK-2310
MK-1353	0.040"	0.015"	MK-2320

MK-3 Series Cut Only Tools

Part#	Cut Lgth.	Lead Dia.	Rep. Blades
MK-1354	0.080"	0.035"	MK-2325
MK-1355	0.060"	0.025"	MK-2330

MK-6 Series Swage and Cut, Flush Cut Only Tools

Exclusive trigger activated, V-type blades, swage the lead to typically twice the wire diameter (ensuring a good mechanical retention) or cut leads flush to the PCB before or after soldering. All tools are ergonomically designed, eliminating operator fatigue, and helping to prevent carpal-tunnel syndrome.

MK-6 Series Cut and Swage Tool

Part#	Cut Lgth.	Lead Dia.	Rep. Blades
MK-1361	0.040"	0.032"	MK-23100

MK-6 Series Flush Cut Tool

Part#	Cut Lgth.	Lead Dia.	Rep. Blades
MK-1362	Flush	0.032"	MK-23100
